

3 BEST FOR... **BASS**

DENON AH-C360

£45, WWW.DENON.CO.UK

If you like your bass to be heavy and dirty, the Denon AH-C360s are your kind of earphones. Their impressive low end – ideal for drum and bass or rock tracks – is created using clever micro-engineering, intelligent tuning and advanced driver materials. The Goldrings give a more balanced sonic performance, but these have real grunt.

The fit is comfortable too, with the natural shape of the chassis sitting ergonomically in the ear. The build quality is impressive and looks more high-end than the £45 price tag would imply. Quite a bargain.

LOVE Incredible bass puts others to shame

HATE Clearly not so good for non-bass lovers... 🐻
